

## □ Application tip

The foreign students might feel a difficult to fill out the address page.

There is no foreign address in the application page so just search any address in Korea such as 봉천동 or

대학동, and then put your home country address in the detail address box.

If you are foreign student, there will be no problem to complete the application even if your post address is in

Seoul. Also, finish your parent's address as the same way.□
